

FREEDOM RYDER

800-800-5828 PATENTED MADE IN USA SERVICEMNT.LTD.

SUPERBIKE TWIST SHIFT

The Twist shift is the entry level bike in the Superbike line. It has the same seating position and handling characteristics of all the Superbike line at an affordable price. Shifting and braking controls are located on the handlebars on each side of the seat. This location is very convenient for novice riders and puts the braking and shifting always within quick reach. Many riders who are new to handcycling choose the Twist shift for their first bike.

Shimano grip-shift on the Superbike

Freedom Ryders lean through corners like a bicycle...like a handcycle should be!
